

React.js Beginner Mock Interview Questions & Answers

1. What is React?

React is a JavaScript library used for building user interfaces, especially single-page applications.

2. What are Components in React?

Components are reusable and independent UI pieces.

3. What are Props?

Props are read-only inputs passed from parent to child components.

4. What is State?

State is a mutable data object that determines component behavior and UI rendering.

5. Difference between Props and State?

Props are read-only and passed from parent; State is internal and changeable.

6. What is useState?

useState is a hook used to create and manage state in functional components.

7. What is useEffect?

useEffect is used for side effects like API calls, timers, and event listeners.

8. What is Virtual DOM?

A lightweight JavaScript copy of the real DOM that improves performance.

9. What are Keys in React?

Keys help React identify list items when updating the UI.

10. What is JSX?

JSX allows writing HTML-like syntax inside JavaScript.

11. What is a Controlled Component?

A component where form data is controlled by React state.

12. What is Context API?

A way to pass data globally without props-drilling.

13. What is React Router?

A library for navigation and routing in React apps.

14. What is Redux?

A state management library with a store, actions, and reducers.

15. What is React.memo?

A higher-order component that prevents unnecessary re-renders.

16. What is useCallback?

A hook that memoizes functions.

17. What is useMemo?

A hook that memoizes expensive calculations.

18. What is lazy loading?

Loading components only when needed to improve performance.

19. What is Fragment?

A wrapper used to group elements without adding extra DOM nodes.

20. What is an Error Boundary?

A component that catches JavaScript errors and shows fallback UI.
